- Italian: (trying)

ABOUT ME

I'm a third-year student at the University of Łódź, seeking my first experiences as a frontend developer to enhance my skills and build collaborations. I thrive on challenges and have a strong ability to learn quickly.

WORK EXPERIENCE

mPay   JUL, 2024 - JAN, 2025
Intern Fullstack Developer

- During my 6-month internship at mPay, I developed APIs in C# and gained hands-on experience in frontend development. I collaborated with the team to enhance user-facing features, applying my knowledge of JavaScript and React. I worked on building scalable solutions and troubleshooting issues, gaining valuable insights into full-stack development.

InConventus Group   Jun, 2020 - Oct, 2020

Video Editor

- At Inconvetus, I was responsible for editing videos using Premiere Pro and After Effects, creating dynamic content with smooth transitions and effects. Additionally, I worked on simple graphic designs in Photoshop to complement video projects, ensuring visual consistency and high-quality presentations.

PROJECTS

SwiftDrop
- An informational and fully responsive webpage demonstrating the usage of a delivery app. This project was focused on learning proper HTML & CSS structuring, responsive design, and building UI components such as pricing plans.

EatCheap
- A web application designed to help students plan budget-friendly meals. EatCheap allows users to manage ingredients, generate affordable recipes, and optimize their grocery shopping. Built with React for the frontend and Node.js/Express for the backend.

Instagram- Clone
- A web page simulating a phone interface where I recreated Instagram. This project focuses on DOM manipulation, creating interactive UI elements,
